DETAILED ACTION

Allowable Subject Matter

Claims 30-64 are allowed.

The following is an examiner's statement of reasons for allowance:

Independent claims 30, 45, 50, 51, and 59-62 as amended each require accessing publicly accessible links to identify portion of content in a first language that is not yet translated from a URL. This, in effect, eliminates an co-mingling between the website hosting the content in the first language, and the accessing and scheduling functions. Lakritz discloses a Manager's console that identifies when a URL should be translated. However, the Manager's console and web content in the first language in Lakritz are connected through a "Workflow Pipeline" (see column 9, lines 45-51). Thus Lakritz does not teach or suggest identifying portions of web pages that are to be translated by accessing publicly accessible links. Additionally, while Kirsch discloses a general web crawler for identifying changes in URL's, neither Lakritz or Kirsch discloses identifying *portions* of a URL that are to be translated. Lakritz teaches subsets of a website may be translated (column 6, lines 19-20), however, this refers to a subset of a plurality of URL's that make up the website. Lakritz and Kirsch do not disclose or suggest crawling an origin website to identify portions of a URL that are to be translated to a second language. The additional prior art of record also does not disclose or suggest, in combination with the additional features of the independent claims, these limitations.
